-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --  
Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

**Status**

- 1) ☒ Responsive to communication(s) filed on 16 August 2007.
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

Claim 1 is objected to because of the following informalities: the phrase "the winch" lacks antecedent basis. Appropriate correction is required.

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1,2,9,10 and 27 are rejected under 35 U.S.C. 103(a) as being unpatentable over Cotter or Sperry in view of Jacobs and Port. Cotter and Sperry show the claimed system with the exception of his pulley being fixed near to a roof and the movable pulley. Jacobs show a pulley being permanently attached near a roof edge and further teaches the attachment of the load on the side of the loop adjacent to the building. Port shows a movable pulley 5. It would have been obvious to one of ordinary skill in the art at the time the invention was made to provide either Cotter or Sperry with a permanently attach the pulley near a roof edge, as taught by Jacobs, to enable the rescue of people at a location near the roof of a building, and a movable pulley, as taught by Post, for tensioning the their loops. To use a conventional breech, loadable hoist winch for the winch of Cotter or the winches

of Sperry, would have been an obvious engineering expediency, by the substituted uses of known elements for their known advantages.

Claim 28 is rejected under 35 U.S.C. 103(a) as being unpatentable over either Cotter or Sperry, Jacobs and Port, as applied to claim 1 above, and further in view of Kreuter. Kreuter shows a plurality of pulleys 44 for deflecting the path of a cable loop. It would have been obvious to one of ordinary skill in the art at the time the invention was made to provide the system of either Cotter or Sperry with a deflecting pulley, as taught by Kreuter, for deflecting the path of their respective loop.

Applicant's arguments with respect to claims 1,2,9,10,27 and 28 have been considered but are moot in view of the new ground(s) of rejection.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Alvin C. Chin-Shue whose telephone number is 571-272-6828. The examiner can normally be reached on Monday-Friday, 8:00 a.m. - 4:30 p.m..
